OBSERVATIONS.

READ CAREFULLY BEFORE ORDERING.

The Proprietor, having devoted upwards of forty-five years to Horticulture (thirty-four years in California) in its several departments, feels confidence in his ability to select from the general catalogue of seeds, plants and trees such species and varieties only as are really worthy of cultivation, to the exclusion of all the various sorts that are not adapted to our climate, but which are too frequently recommended and sold by seedsmen and vendors, to the serious loss and disappointment of their customers.

My employees are, for the most part, trained florists and seedsmen, some of whom have been with me from twelve to fifteen years.

As the seed business has always been pursued with a view to a permanent establishment, great care has been taken to preserve an unsullied reputation, by having supplies of various seeds raised annually by careful growers, and in no case will he run the risk of offering seeds of an uncertain and varied quality by purchasing of transient persons.

My greenhouse department covers over half an acre, comprising eight greenhouses, some of them over one hundred feet long, and is second to none on the Coast.

As most of the plants in pots are large, the low prices named will compare favorably with Eastern prices.

I have no other calling to draw my attention otherwise than that of the nursery and seed trade, to which exclusively I devote the whole of my time. I am, therefore, enabled to give the utmost personal attention in the execution of orders, and when my customers prefer leaving the selection to me, I shall send what I consider most suitable for their requirements and the locality they are intended for.

Having purchased land at Piedmont with the view of moving my nursery there I offer many large specimens of ornamental trees and flowering shrubs suitable for immediate effect on large grounds. Parties contemplating improving their grounds would do well to examine my stock before purchasing elsewhere.

Plants by mail. No order under one dollar will be filled, and only small plants can be sent.

Correspondents will please write their names, post office address, county and State very distinctly, and their orders on a separate sheet from the body of the letter.

I employ no traveling agents. Send direct to headquarters, and then you are sure of obtaining a genuine article at a moderate price.

All plants will be packed in the best manner, and distinctly marked as directed by the purchaser. After delivery at railroad station, express or steamer, they will be at the risk of the purchaser.

Good gardeners recommended to lay off grounds.

Choice cut flowers, smilax, etc., in quantity a specialty.

CHOICE BOUQUETS, WREATHS, CROSSES and all the latest forms of floral decoration furnished to order, on short notice.

IMPROVED FLOWER POTS.

We call the attention of Florists and those using large quantities of Flower Pots to the superior style and finish of our goods, which for durability and finish cannot be excelled on this coast. The IMPROVED FLOWER POT is made expressly for shipping. As will be seen by the cut, they are made so that the shoulder of one rests on the edge of the other, thus preventing the wedging of one into the other, which is the main cause of breakage in transit. The improved and the old style of Pots and Saucers are the same price. Special rates to Florists.

TERRA COTTA CHIMNEYS.

Terra Cotta Chimneys, which in the last few years have come into such general use, and which we were first to introduce on this coast, are now conceded to be the best smoke flume known. They can be put up by anybody of ordinary intelligence, and as they only weigh from fourteen to eighteen pounds per foot, they can be started from any part of the house, taking up one-third less room than brick chimneys. The above cut represents the different modes of using Miller & Winsor's Pipe Chimneys.
